SUMMARY

Solutions Engineer with hands-on ownership of **ERP** systems, data engineering, and process automation. Skilled in **Python**, **SQL**, and **Power BI**, delivering scalable solutions that improve operational efficiency and data visibility. Experienced in international, remote-ready projects, **AI solutions**, and cross-functional teams. Focused on translating business needs into measurable technical impact.

WORK EXPERIENCE

EI ELECTRONICS KG

Solutions Engineer — December 2024 – Present

- Manage and support **Infor** and **Dynamics 365** ERP operations across three entities, coordinating setup and go-live activities for an international subsidiary as the primary internal technical contact.
- Design and implement **Power BI** data models and dashboards (**DAX**, **SQL**), performing end-to-end **data engineering** from cleaning to presentation, improving data consistency and automating weekly reports.
- Automate key **business processes** (e.g., OCR-based order workflows, invoice posting) and maintain system documentation, security roles, and user enablement using **Confluence** and **SharePoint**.

MERCEDES-BENZ

Intern & Bachelor Thesis — October 2023 – September 2024

Information Office Production & Logistics

- Identified structural inefficiencies in **system documentation** during my internship and translated them into the foundation of my Bachelor's thesis.
- Developed an **AI-based prototype** on **Azure** to automate and improve system documentation, based on workflow inefficiencies identified during the internship.
- Standardized project communication and task tracking using **ServiceNow**, **Mural**, and **Jira**.

METRO MARKETS

Seller Support (Working Student) — March 2022 – September 2023

- Supported ERP and process readiness for international operations in Italy, Portugal, Netherlands, and France.
- Built **Power BI** dashboards in collaboration with BI team for seller and product analytics.
- Supported seller and product analytics for a key customer through reporting, data-driven insights, and operational support.

CERTIFICATES

Digital Shaper
(AI & Deep Learning)
TechLabs | Germany, Sep 2024

Digital Shaper
(Data Science)
TechLabs | Germany, Apr 2024

Full Stack Developer
Udacity | UAE, Aug 2018

VOLUNTEER EXPERIENCE

TechLabs Global
2024 – 2025
Growth Acceleration Manager

WORKSHOPS

- Microsoft Dynamics 365 Business Central
- AI Governance & Ideation

AWARDS

Robotics Race – First Place
Hochschule Bochum | Germany, 2021

EDUCATION

BOCHUM UNIVERSITY OF APPLIED SCIENCES
Bachelor of Science in Business Informatics
Bochum, Germany | October 2021 – October 2024
Final Grade: 2.19 (Good – German grading system)
Relevant Coursework: Data Science, Software Engineering, Python, Java, Algorithms, AI

RHEINISCHES STUDIENKOLLEG
Business and Mathematics College Course
Bonn, Germany | January 2017 – November 2017
Final Grade: 1.3 (Very Good – German grading system)

PROJECTS

AI SOCIAL MEDIA CONTENT ENGINE
January 2026

- Built a social media content creation tool using the Gemini API and Cloudflare KV for storage, deployed on a custom domain.
- Created an initial mock-up with Lovable, then implemented the final version with React and serverless APIs.

WORD OF THE DAY BOT
April 2024

- Created a bilingual word library with translations, examples, and transliterations, organized into chapters.
- Built a Cloudflare Worker connected to the Telegram Bot API to publish a daily word and avoid repetitions.

CINEMALYTICS
April 2024

- Built a machine learning-driven movie recommendation platform for producers to choose optimal streaming platforms, using **Python** and **SQL**.
- Applied models such as **Random Forest** to analyze genre-platform performance and optimize placement decisions.
