TECHNICAL SKILLS

Data Analysis & Modeling
Business Intelligence & Reporting
Data & Workflow Automation
ERP & System Integration
AI Engineering & Integration
Technical Documentation
Remote Collaboration

TOOLS & PLATFORMS

Python, SQL, Java, JavaScript
(React)
Power BI (DAX, data modeling)
Azure, AWS, Cloudflare
REST APIs
Infor, Dynamics 365 Business
Central
Salesforce (CRM)
Git
Jira, Confluence, SharePoint

LANGUAGES

English – Fluent
German – Fluent
Arabic – Native

SUMMARY

Solutions Engineer with hands-on ownership of **ERP** systems, data engineering, and process automation. Skilled in **Python**, **SQL**, and **Power BI**, delivering scalable solutions that improve operational efficiency and data visibility. Experienced in international, remote-ready projects, **AI solutions**, and cross-functional teams. Focused on translating business needs into measurable technical impact.

WORK EXPERIENCE

EI ELECTRONICS KG

Solutions Engineer (Data & AI)

March 2026 – Present

- Drive process automation initiatives across departments using **n8n** and **Power Automate**.
- Design and implement agentic **AI** solutions with **Microsoft Copilot Studio** across business functions, representing AI topics within IT.
- Engineer **Power BI** data models and dashboards (**DAX**, **SQL**) and perform end-to-end **data engineering** from cleaning and transformation to presentation, improving data consistency and automating weekly reports.

Solutions Engineer (ERP)

December 2024 – March 2026

- Managed and supported **Infor** and **Dynamics 365** ERP operations across three entities, acting as the primary internal technical contact for setup and go-live activities for an international subsidiary.
- Automated key **business processes** (e.g., OCR-based order workflows and invoice posting) and maintained system documentation, security roles, and user enablement in **Confluence** and **SharePoint**.
- Developed and maintained **REST API** integrations between the ERP environment and internal and external services and endpoints.

MERCEDES-BENZ

Intern & Bachelor Thesis

October 2023 – September 2024

Information Office Production & Logistics

- Identified structural inefficiencies in **system documentation** during my internship and translated them into the foundation of my Bachelor's thesis.
- Developed an **AI-based prototype** on **Azure** to automate and improve system documentation, based on workflow inefficiencies identified during the internship.
- Standardized project communication and task tracking using **ServiceNow**, **Mural**, and **Jira**.

CERTIFICATES

- AI Automation Specialist

Digital Beat GmbH | Germany, Jun 2026
- Digital Shaper
(AI & Deep Learning)

TechLabs | Germany, Sep 2024
- Digital Shaper
(Data Science)

TechLabs | Germany, Apr 2024
- Full Stack Developer

Udacity | UAE, Aug 2018

VOLUNTEER
EXPERIENCE

- TechLabs Global

2024 – 2025

Growth Acceleration Manager

WORKSHOPS

- Microsoft Dynamics 365 Business Central
- AI Governance & Ideation

AWARDS

- Robotics Race – First Place

Hochschule Bochum | Germany, 2021

WORK EXPERIENCE

- METRO MARKETS

Seller Support (Working Student)

March 2022 – September 2023

 - Supported ERP and process readiness for international operations in Italy, Portugal, Netherlands, and France.
 - Built **Power BI** dashboards in collaboration with BI team for seller and product analytics.
 - Supported seller and product analytics for a key customer through reporting, data-driven insights, and operational support.

EDUCATION

- BOCHUM UNIVERSITY OF APPLIED SCIENCES

Bachelor of Science in Business Informatics

Bochum, Germany | October 2021 – October 2024

Final Grade: 2.19 (Good – German grading system)

Relevant Coursework: Data Science, Software Engineering, Python, Java, Algorithms, AI
- RHEINISCHES STUDIENKOLLEG

Business and Mathematics College Course

Bonn, Germany | January 2017 – November 2017

Final Grade: 1.3 (Very Good – German grading system)

PROJECTS

- BONUS CALCULATOR (EI ELECTRONICS)

July 2026

 - Built a **React** web application connected to the ERP system through a **MySQL** database to automate high-level accounting calculations.
 - Delivered a KPI dashboard and reporting layer supporting management decisions, including data-driven price recommendations.
- INVOICE FORMAT CONVERTER (EI ELECTRONICS)

June 2026

 - Built a **Python** desktop application, packaged as an executable with a simple UI, that converts invoices from PDF into the **XML** format required by the ERP system.
 - Automated extraction and validation with **pandas** to work around an ERP format limitation while keeping every document within defined process criteria.
- WORD OF THE DAY BOT

April 2024

 - Created a bilingual word library with translations, examples, and transliterations, organized into chapters.
 - Built a Cloudflare Worker connected to the Telegram Bot API to publish a daily word and avoid repetitions.
- CINEMALYTICS

April 2024

 - Built a machine learning-driven movie recommendation platform for producers to choose optimal streaming platforms, using **Python** and **SQL**.
 - Applied models such as **Random Forest** to analyze genre-platform performance and optimize placement decisions.
